CONTAINER GROWN PLANTS

We are pleased to include in this list, a special section devoted entirely to container grown plants. While this method of growing nursery stock is not new with us, we do pride ourselves in developing an assortment of popular items in a short span of time.

These plants have been grown two years or more in the size container best suited to them for producing a perfect root system. This in turn assures you success when transplanting. We know you will be well pleased with the results.

Additional profit is now yours with the planting season extended several weeks of the year through the use of container grown material—No more waiting because of inclement weather making it impossible to dig. Just select the plants needed for your job and carry them away.

Please plan to visit us soon. We want you to see this assortment. We know you will be as enthusiastic as we are about it.
